DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moore et al (PTO-1449-2 5,651,332) in view of Fife et al (5,000,116). Moore et al show an interactive pet device comprising a first plate 3 having top and bottom sides, a second plate 1 having top and bottom surfaces and a side wall 2 having a first and second end, the first end coupled to the top surface of the second plate 1 and the second surface coupled to the bottom side of the first plate 3. The pet device also having an elongate flexible member 7 where a toy 11 is secured to the free end. The top plate 3 also having a cushion covering it. Fife et al show a pet bed having a first plate/cushion 20 and a second plate/cushion 40, the plate separated by a rib 30. The rib 30 is held upright by a plurality of rib inserts 32 or posts. With respect to claim 1, it would have been obvious to one skilled in the art to hang the device of Moore et al with more than one pet toy to offer the pet a variety of amusements. With respect to claim 1, to use the multiple posts of Fife et al in place of the sidewall of Moore et al would have been obvious to one skilled in the art wishing to allow the pet choices of where it wishes to enter and exit the device.

Art Unit: 3644

With respect to claim 9, to attach the toy of Moore et al to a biasing means or spring would have been obvious to one skilled in the art wishing to create movement more attractive to the pet.

Allowable Subject Matter

Claims 2, 4-8, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 12 is allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference on pet toys and devices are: Neumann (3,989,008), Haynes et al (5,072,694), Boshears (5,579,725), Caldwell (5,860,389) and Hann (5,881,679).
